City-wise AQI Overview

City ● Ahmed... ● Delhi ● Patna ● Gurugr... ● Lucknow ● Talcher

This map displays the geographical distribution of cities in South Asia, with colored circles representing their AQI. The circles are color-coded according to the legend: blue for Ahmedabad, dark blue for Delhi, orange for Patna, purple for Gurugram, pink for Lucknow, and blue-violet for Talcher. The size of each circle indicates the AQI value, with larger circles representing higher AQI. The map includes labels for major cities like Kabul, New Delhi, Kathmandu, and Naypyidaw, as well as neighboring countries and regions like Pakistan, Nepal, Bhutan, Bangladesh, Myanmar, and Sri Lanka. The Bay of Bengal and Laccadive Sea are also labeled.

This map illustrates the geographical distribution of 20 distinct ethnic groups across South Asia. The groups are represented by colored circles, where the color corresponds to the group and the size indicates its relative population or density. The map covers a region from Afghanistan in the northwest to the Malay Peninsula in the southeast, including India, Pakistan, Nepal, Bangladesh, Bhutan, Myanmar, and Sri Lanka. Major cities such as Kabul, New Delhi, Kathmandu, and Dhaka are marked. The map also shows the Bay of Bengal, Andaman Sea, and Laccadive Sea. The legend at the bottom identifies the ethnic groups by color: Afghanistan (orange), Pakistan (light blue), India (dark blue), Nepal (pink), Bangladesh (orange), Bhutan (green), Myanmar (purple), Sri Lanka (yellow), and others. The map is sourced from Microsoft Bing and OpenStreetMap.
